

PROFESSIONAL SUMMARY

Product Engineer with 2 years of experience building 0→1 enterprise SaaS products from customer discovery to launch. Experienced in product discovery, requirement gathering, feature prioritization, and cross-functional execution to deliver scalable workflow and analytics platforms.

WORK EXPERIENCE

OctoDo Solutions Pvt. Ltd.

May 2024 – Mar 2026

Product Engineer (Product Systems) (Intern → Full-time)

- Led product discovery, roadmap planning, and delivery for **2** enterprise SaaS products, collaborating with customers and cross-functional teams from concept to launch.
- Authored PRDs, user stories, acceptance criteria, and sprint backlogs while partnering with Engineering, Design, QA, and Business teams.

— *IntelliQ – Enterprise Data Analytics Platform* [Case Study](#) | [Figma](#) | [Live](#)

- Built a configurable workflow platform replacing spreadsheet-based operations across **4 organizations**, conducting **20+ customer interviews** to define product requirements.
- Defined MVP, PRDs, and user journeys for a configurable workflow platform, improving daily user engagement through role-based data capture and automated workflows.
- Delivered **40+** releases for a configurable workflow platform, integrating **80+** REST APIs and enabling **200+** users to manage **1.5k+** Smart Sheets and **100+** interactive dashboards.
- Achieved **95%+** adoption, reducing manual effort by **~60%** and workflow processing time by **~50%**.

— *EcoIndex – Event Sustainability & Carbon Accounting Platform* [Case Study](#) | [Figma](#) | [Live](#)

- Built an ESG and carbon management platform by conducting **20+** customer interviews to define Scope 1, 2, and 3 carbon accounting workflows.
- Increased user retention to **65%** by introducing rewards for users, daily challenge notifications, and affiliate features, iterating the product through continuous customer feedback.
- Delivered a platform adopted by **250+** enterprise customers and **1,000+** users across **6** organizations, including **ITC Hotels** and **Radisson Hotels**.
- Enabled organizations to measure over **1.8M+ kg CO₂e** across **42+** events, helping reduce **32%** plastic waste and **18%** fuel consumption through data-driven sustainability insights.

KloudStac

Jun 2023 – Aug 2023

Cloud Developer Intern (Remote) [Certificate](#)

- Built an enterprise AI assistant using Azure OpenAI, Azure Cognitive Search, and Azure Form Recognizer, enabling intelligent document retrieval and automated document processing for enterprise knowledge management.
