PROFESSIONAL SUMMARY

Product-focused Engineer with 1.5+ years of experience in designing and building scalable SaaS products, owning end-to-end product development (0→1) from user research to implementation. I am **an immediate joiner**, ready to contribute from day one. Proficient in defining product features, designing workflows, and developing data-driven systems, with a proven ability to collaborate cross-functionally to deliver impactful solutions that improve user experience and drive business outcomes.

EDUCATION

Indian Institute of Technology (IIT) Ropar Nov 2020 – July 2024
Metallurgical and Materials Engineering

SKILLS

- Product:** Product Discovery, User Research, Stakeholder Management, PRDs, Roadmapping, Prioritization (RICE), Workflow Design, Product Metrics, Data Products, Data-Driven Decision Making, Agile Methodologies.
- Technical:** React.js, Redux Toolkit, JavaScript, TanStack Table, Recharts, Tailwind CSS, APIs, SQL (Basic), Data Systems.
- Design:** Figma, Adobe Photoshop, Illustrator & Wordpress.

WORK EXPERIENCE

OctoDo Solutions Pvt. Ltd. May 2023 – Present
Product Engineer (Frontend & Product Systems) (Intern → Full-time)

- Led product discovery with clients and internal stakeholders, conducting user research to identify inefficiencies in spreadsheet-based workflows across distributed teams.
- Designed end-to-end workflows, user journeys, and structured data models across the product lifecycle, replacing manual Excel processes with a scalable SaaS system.
- Owned UI/UX design and frontend implementation, enabling intuitive data entry, role-based workflows, and dashboard creation.
- Built analytics dashboards improving visibility into operational metrics and enabling faster, data-driven decision-making.
- Collaborated with backend teams to define APIs and ensure reliable, scalable data flow across systems.

KloudStac June 2023 – Aug 2023
Cloud Developer Intern (Remote) Certificate

- Deployed a generative AI chatbot on Azure using OpenAI and Cognitive Search for document-based query resolution
- Built automated document extraction pipelines using Azure Form Recognizer, reducing manual processing effort

PROJECTS

IntelliQ – Enterprise Data Analytics Platform Case Study | Design | View Tool
Role: Product Development & Strategy

- Led 0→1 product development by conducting stakeholder interviews to identify inefficiencies in Excel-based workflows.
- Designed data models and role-based workflows to standardize data entry and reduce cross-team inconsistencies.
- Built product allowing users to create custom data sheets, assign ownership, and generate real-time analytics dashboards.
- Prioritized core workflows over edge cases to drive faster adoption and reduce onboarding friction.
- Collaborated on backend architecture to ensure scalable and reliable data systems.
- Impact:** Adopted by 50+ active users across 4 organizations, replacing manual spreadsheet workflows and improving data reliability and decision-making.

EcoIndex – Event Sustainability & Carbon Tracking Platform Case Study | Design | View Tool
Role: Product Development & Strategy

- Identified lack of standardized emissions tracking and defined workflows across Scope 1, 2, and 3 emissions.
- Designed end-to-end data capture flows across event lifecycle (travel, accommodation, energy, waste), enabling structured and reliable data collection.
- Designed mobile application and web platform from scratch across the product lifecycle, incorporating user feedback, workflow design, and UI/UX for emissions tracking and reporting.
- Built system enabling users to track emissions, generate insights, and monitor sustainability metrics in real time.
- Impact:** Tracked 1,080,000+ kg CO₂ across 20+ events, enabling data-driven sustainability decisions.

LEADERSHIP & ACHIEVEMENTS

- Secured **99.56 percentile** in JEE Mains (Top 1% in JEE Advanced).
- Graphic Design Lead, Zeitgeist (Cultural Fest) & Aarohan (Sports Fest), IIT Ropar (2023).
- Mentor & Representative, Vibgyor Fine Arts Club, IIT Ropar (2021–2023).
